OBITUARY:
MR. LESTER B. HARVEY
April 4th, Mr. Lester B. Harvey, 63 years old, died at his home here today at 2 A. M., of cerebral hemorrhage. When he was twelve years old he was stricken with infantile paralysis and was thus physically handicapped when a young boy. He worked diligently with a fixed purpose of mind and a determination to succeed. You always found him the same man, steady and dignified with a fixed purpose of mind to overcome the trials and adversities of life. He never abandoned a project because it was difficult but went on until he succeeded. Every person confided in the soundness of his judgment and trusted in his honesty as a salesman. If he had an appointment to fill he suffered no impediments to interrupt him. He was one of your practical men that set themselves to work in good earnest and from the same fixed and faithful part, never declining until their aim was accomplished. It pleased the Father of Mercies to conduct him through some severe afflictions. He was liked and trusted by the high and low, the rich and poor, white and black, every body liked Lester B. Harvey. He made a success in life and established a record for every afflicted person to think and see what courage and perseverance can do. He taught Sunday School and his influence will go on. Let us live in this world as he taught us in his Sunday School Class and the life he lived in and out of Church.
What is there on earth so truly noble as to live the life and die the death of a Christian.
—A Friend.

TO AWARD CERTIFICATES
As part of a concentrated effort to reduce the vast toll of human suffering and to eliminate the $20,000,000 cost due to over 112,000,000 industrial accidents each year, the Department of Labor and Industry is today awarding certificates of commendation to those establishments cooperating in the industrial safety program.
This cooperative program on the part of industry and the State was inaugurated in April, 1949, shortly after Edmond M. Boggs was appointed Commissioner of Labor and Industry. At the present time approximately 500 establishments have set up safety programs and are being awarded certificates.
Expressing confidence that the program will be successful, Commissioner Boggs said, "Accidents don't happen—they are caused. The prevention of industrial accidents has now attained the status of an exact science. The universal application of the principals of safety engineering by industry throughout the State cannot be other than effective."
